Hyderabad, India

SUMMARY

Software Engineer skilled in Java, Python, SQL, and REST APIs. Worked on workflow automation, CRM integration, and data pipelines using Salesforce tools. Familiar with AI/ML concepts, including preprocessing and model evaluation. Strong in debugging, documentation, and Git-based collaboration.

SKILLS

Languages	Java, Python
Backend / API	REST APIs, JSON, Postman
Database	SQL, MySQL, PostgreSQL
Tools	Git, GitHub
AI/ML	Machine Learning basics, Data preprocessing, Model evaluation
Automation / CRM	Salesforce Flow, Salesforce Data Cloud, Agentforce

EDUCATION

CMR Institute of Technology, Hyderabad – B.Tech (CSE - Data Science)	2023 – 2027
Master Minds Junior College, Siddipet – Intermediate	2021 – 2023
Vikas High School, Siddipet – School	2020 – 2021

PROJECTS

Automated Guest Check-in System

- Tools: Salesforce Data Cloud, Salesforce Flow, Agentforce
- Automated guest onboarding and check-in using Salesforce Flow.
- Integrated guest and reservation data via Data Streams for real-time updates.
- Applied identity resolution rules to merge duplicates and improve profile accuracy.

Shopping Behavior Analytics Pipeline

- Tools: Python, SQL
- Built ETL pipeline to clean, transform, and load shopping datasets.
- Wrote SQL queries for KPI reporting and customer purchase trend insights.
- Prepared datasets for analytics and ML-ready reporting.

CERTIFICATIONS

– Salesforce Certified Agentforce Specialist	Dec 2025
– Deloitte Data Analytics Program (Forage)	Nov 2025
– Tata GenAI Powered Data Analytics Job Simulation (Forage)	Nov 2025
– Introduction to Data Science - Cisco Networking Academy	Jan 2026

STRENGTHS

- Quick learner and adapts to new technologies fast
- Good problem-solving and debugging skills
